

**REPUBLIC OF ALBANIA
REGIONAL WATER SUPPLY AND SEWERAGE COMPANY OF DURRËS SH.A
SUPPORT SERVICES DEPARTMENT
LOGISTICS DIRECTORATE**

RECORD OF PROCEEDINGS – Type of contract– Goods

**ON THE ARGUMENTATION AND APPROVAL OF TECHNICAL SPECIFICATIONS
AND QUALIFICATION CRITERIA**

(This record of proceedings is intended for publication purposes along with the tender documents)

OBJECT OF THE PROCEDURE:

"PURCHASE OF SPARE PARTS FOR VEHICLES"

**CORRESPONDING CODE IN THE COMMON PROCUREMENT VOCABULARY
(CPV):**

Spare parts for vehicles, vans, and freight transport trucks – **34330000-9**

Limit Fund: 29,880,882.5 (twenty-nine million eight hundred eighty thousand eight hundred eighty-two point five) ALL without VAT.

The value of the Limit fund in the international currency Euro according to the exchange rate of the Bank of Albania is **303.821.88** (Three hundred three thousand eight hundred twenty-one point eighty-eight) Euro without VAT.

The official exchange rate according to the Bank of Albania on 02.06.2025 is 98.35

Argumentation: The calculation of the limit fund value has been made in reference to Article 35 of Law No. 162/2020, as well as Article 13 and Article 76 of Decision of the Council of Ministers (DCM) No. 285, dated 19.05.2021, as amended.

Pursuant to Article 21, point 2, of Law no. 162/2020 “On Public Procurement”, Article 2, point 2/c, and Article 78, point 2, of Decision no. 285, dated 19.05.2021 “On the Approval of Public Procurement Rules”, the contracting authority/entity SHRUKD sh.a has drafted the given record of proceedings for the reasoning and approval of the technical specifications and qualification criteria for the aforementioned procedure, with the following content:

I. SPECIFIC QUALIFICATION CRITERIA

1. The candidate/bidder must submit:
 - a. Bid Security, as per Annex 4.
 - b. Summary Self-Declaration Form, as per Annex 9.

Argumentation: The above criteria are based on Articles 76, 82, and 83 of the Public Procurement Law (PPL) and Article 26 of Decision No. 285, dated 19.05.2021, “On the Approval of Public Procurement Rules.”

2. The candidate/bidder must submit:
 - 2.1. Suitability to Perform Professional Activity (*if applicable*):
According to the general admission/qualification criteria.

Argumentation: The aforementioned criterion is based on Article 77, point 1/a and 2 of the PPL, Article 39, point 6/b, and Article 40, point 5 of Decision No. 285, dated 19.05.2021, “On the Approval of Public Procurement Rules”.

(Note: Determine, if applicable, the specific legal or sub-legal act that requires compliance with any specific condition for conducting professional activity related to the object of procurement or the necessity for economic operators to be registered in one of the professional or commercial registries, in cases where such registration is mandatory under the relevant legislation).

2.2. Economic and Financial Capacity:

2.2.1. To demonstrate their financial and economic capacity, economic operators must submit proof of their annual turnover for the financial years **2022, 2023, and 2024**, where the turnover value for at least one of the required years must be no less than 40% of the estimated threshold value.

Argumentation: The aforementioned criterion is established based on the estimated budget limit of this procedure, as well as Article 77, point 3 of the Public Procurement Law (PPL) and Article 43 of Decision No. 285, dated 19.05.2021, "On the Approval of Public Procurement Rules," as amended.

Note: *Since legal and sub-legal acts provide a margin for the turnover value that may be required, contracting authorities/entities must justify the requested turnover value within this margin.*

The determination of the years required for submitting the turnover verification is based on:

Article 43, points 1 and 2, and Article 64 of Law No. 9920, dated 19.5.2008 (as amended), "On Tax Procedures in the Republic of Albania." Instruction No. 5, dated 30.01.2006, "On Income Tax," issued by the Minister of Finance, as amended. Decision of the Council of Ministers (DCM) No. 922, dated 29.12.2014, "On the Mandatory Declaration of Tax Returns and Other Tax Documents Exclusively in Electronic Form."

2.2.2 Economic operators must submit annual balance sheets for the financial years 2022, 2023 and 2024, submitted to the tax authorities and confirmed by these authorities, accompanied by the Expertise Act of the Authorized Accountant, in the case where they are in accordance with the provisions of article 41, point "c", of Law no. 10091, dated 5.03.2009 "On statutory audit, organization of the profession of statutory auditor and approved accountant", as amended. The criterion shall be deemed fulfilled if the balance sheets are in accordance with the provisions of article 43/4 of the Council of Ministers No. 285, dated 19.05.2021, as amended, where the balance sheets of two consecutive years must not have a negative ratio between assets and liabilities. In the case of a group of economic operators, this condition is met by each member of the group .

Argumentation: The aforementioned criterion is determined based on Article 77, point 3, of the PPL , as well as Article 43, point 4, of the Council of Ministers No. 285, dated 19.05.2021 "On the approval of public procurement rules".

The determination of the years required for the presentation of balance sheets is made by referring to the legislation in the field, specifically in Article 29, point 1 of Law No. 8438, dated 28.12.1998 "On income tax" as amended, as well as the requirements of Law No. 25/2018 "On accounting and financial statements".

2.2.3 Economic operators must submit certificates proving that they have paid the relevant local taxes and fees, in accordance with the provisions of Law No. 9632, dated 30.10.2006 "On the local tax system", as amended, in all countries where they have exercised or are exercising activity according to the Central Bank data, for the year **2025**.

In cases of group of economic operators, each member of the Group of Economic Operators must submit the certificate issued by the relevant Administrative Units where they have exercised or are exercising activity for the year 2025, according to the Central Bank data.

Note: *At the time of evaluation and review of the qualification criteria, this criterion will be considered fulfilled upon submission of the summary self-declaration according to Annex 9, based on Article 82 of Law No. 162/2020 "On Public Procurement" as well as on letter dh) of point 2 of Article 26 of Decision No. 285 dated 19.05.2021 of the Council of Ministers "On the approval of public procurement rules", as amended.*

The supporting documentation will be submitted by the qualified bidder in the first place, to the contracting authority, before the publication of the successful bidder announcement and the start of the appeal deadlines, or if it is necessary to request clarifications from the CA.

Argumentation: The aforementioned criterion is determined based on Article 77, point 3, of the PPL , as well as Article 43, point 6, of the Council of Ministers No. 285, dated 19.05.2021 “On the approval of public procurement rules” and in Law No. 9632, dated 30.10.2006 “On the Local Tax System” as amended, in Law No. 9920 dated 19.05.2008 “On tax procedures” as amended, Article 4, point 2 d).

In witness whereof, the CA considers that the established criterion regarding the self-declaration by economic operators of the verification of the settlement of local obligations for the year 2025 according to the requests to the municipality/s where the economic operator exercises its activity is in accordance with the legal framework in force, specifically with Law No. 9632, dated 30.10.2006 on the “Local Tax System”, as amended. All entities that carry out business activities have the legal obligation to register with the National Business Center in order to make the location of their activity identifiable and to be subject to the payment of local taxes expressly provided for in this law.

2.3 Technical and professional skills:

2.3.1 The economic operator must provide evidence of previous similar supplies, carried out during the last three years from the date of publication of the contract notice, in a value not less than 40% of the threshold value of this contract.

To prove previous similar experience, economic operators must provide the following evidence:

- a). for previous experience with the public sector, the economic operator must submit certificates issued by a public entity for the successful completion of the contract, indicating the value, the deadline for the completion of the contract and tax sales invoices, completed according to the requirements of the applicable legislation in force, indicating the dates, amounts and quantities of goods supplied,
- b) for previous experience with the private sector, the economic operator must submit tax sales invoices, completed according to the requirements of the applicable legislation in force, and declared to the tax authorities, indicating the dates, amounts and quantities of goods supplied.

Argumentation: The aforementioned criterion is determined based on Article 77 of Law No. 162, dated 23.12.2020 “On Public Procurement” and Article 40, point 4 of the Council of Ministers No. 285, dated 19.05.2021 “On the Approval of Public Procurement Rules”. This criterion requires economic operators to prove that they have the necessary experience to implement the contract, therefore it is required that previous similar supplies be in the value of no less than 40% of the threshold value , which is within the limit value set out in the above-mentioned article.

- c) The determination of the required value for similar contracts is argued as follows:

The estimated value of the contract is above the upper monetary limit. The value for similar supplies constitutes a sufficient level of experience taking into account the object and the threshold value .

Note: *Since legal and sub-legal acts provide a margin for the turnover value that may be required, contracting authorities/entities must justify the requested turnover value within this margin.*

Previous experience is a very necessary element that guarantees the contracting authority that economic operators, based on the value of similar contracts, have the capacity to successfully implement the contract according to an appropriate quality standard. In support of Article 88, point 1 of DCM 285/2021, it provides that “The bid may be submitted by a group of economic operators, as defined in points 2 and 3, of Article 14, of the PPL , where one of them represents the others during the procedure and, in case of selection, also during the implementation of the contract. The bid must specify the part of the service, work or supply that each of the members of this group will perform through a cooperation contract drawn up between the parties.

2.3.2. The participating economic operator must have at least 1 (one) owned or rented means of transport for the purpose of transporting the goods subject to procurement.

In addition, the vehicle must be equipped with:

- a) Document proving ownership (ownership certificate), /Vehicle registration certificate.
- b) Certificate of technical inspection of road vehicles,
- c) Compulsory vehicle insurance policy
- ç) Tax

In case the vehicle is under a lease agreement, in addition to the above documentation, it must also have a valid lease agreement.

To meet this criterion, economic operators must self-declare the means and equipment they have in the summary self-declaration form.

(The criterion shall be deemed fulfilled by completing the form according to Appendix 8 of the DT. “Before publishing the successful bidder announcement and starting the appeal deadlines, the contracting authority/entity shall first request the qualified bidder to submit the supporting documents provided for in letters “a”, “b”, “d”, “dh”, “e”, “h”, “i”, “j” of point 2 of this article, as well as other documents accompanying the bid, submitted electronically. These documents must be submitted in original or in copy units identical to the original”)

Argumentation: Based on point 4, article 77, of law no. no. 162, dated 23.12.2020 “On public procurement” and article 40, point 5/ç, of the Council of Ministers no. 285, dated 19.05.2021, “On the approval of the Public Procurement Rules”, this criterion requires economic operators to prove that they have at their disposal or that they can be made available the means and technical equipment to fulfill the contract, necessary for the execution of the procurement object.

2.3.3 The economic operator must undertake the supply of the quantity of goods required as the subject of the procurement, at the warehouses of the CA, within the specified deadlines and specifications.

To fulfill this criterion, the economic operator must submit a declaration of compliance with the criteria.

2.3.4 The operator must have a tire fitting facility in the city of Durres, which must have all the necessary equipment for changing tires on cars and heavy vehicles.

This must be proven by a certificate of ownership, lease agreement or cooperation agreement valid throughout the entire duration of the contract. Attached is a photo of the facility.

Argumentation: The aforementioned criterion is determined based on Article 77, point 1 c) of Law No. 162, dated 23.12.2020 “On Public Procurement”, which expressly states that: “Contracting authorities or entities shall determine the qualification criteria for economic operators based on: technical and professional capacity. The criteria are limited only to those that are appropriate to guarantee that a candidate or tenderer has the legal, financial and technical and professional capacities to implement the contract to be awarded. All criteria must be related to and proportionate to the subject matter of the contract...”, as well as in Article 40, point 5 ç) of the Council of Ministers No. 285, dated 19.05.2021, “On the Approval of the Public Procurement Rules”, as amended.

2.4 Other special qualification criteria

2.4.1 The participating economic operator must submit technical catalogues of the goods or assembly schemes. The fragments of the catalogue/s must easily and clearly indicate that they are part of the goods subject to procurement and be translated into Albanian and notarized.

Argumentation: The aforementioned criterion is determined based on Article 77 of Law No. 162, dated 23.12.2020 “On Public Procurement” and Article 40, point 6/b, of the Council of Ministers No. 285, dated 19.05.2021, “On the Approval of Public Procurement Rules”, as amended. The Contracting Authority may request economic operators to submit evidence showing that they meet the minimum criteria set out in the tender documents, such as: b) photographs or technical catalogues.

This criterion requires economic operators to demonstrate that the presentation of the catalogue enables a correct and accurate assessment of the goods to be procured, in order to comply with the specifications required to fulfil the contract.

The contracting authority aims to verify the compliance of the technical specifications of the products offered by the bidding economic operators with those required in the standard tender documents.

“The contracting authority may require economic operators to submit evidence showing that they meet the minimum criteria set out in the tender documents, such as: photographs or technical catalogues...”

2.4.2. The bidding economic operator must submit an authorization from the manufacturer or official distributor for the goods subject to procurement, this verified through original documents as a representative of the manufacturing company, for all goods/goods subject to procurement. In case of submitting an Authorization from the Distributor, the EO must submit a letter of commitment or a valid Agreement between the manufacturer and the distributor between them.

The economic operator must submit the supporting documentation to prove their disposition: Authorization from the Manufacturer or Authorized Distributor.

Argumentation: The aforementioned criterion is determined based on Article 73 and Article 77, point 2 of Law No. 162, dated 23.12.2020 “On public procurement” which expressly states that: “With regard to the suitability to carry out a professional activity, contracting authorities or entities may require economic operators to be registered in one of the professional or trade registers. In procurement procedures for services, where it is necessary for economic operators to have a specific authorization or to be members of a specific organization to perform the service in question in their country of origin, the contracting authority or entity may require them to prove that they have this authorization or membership”.

The authorization from the manufacturer or authorized distributor for the goods offered is an important document which shows the capabilities of the bidding economic operator and is a qualitative indicator of the goods to be offered. In the judgment of the contracting authority, this criterion is non-discriminatory, proportionate to the nature and size of the contract and is directly related to the organizational capabilities, reputation and reliability of the bidding economic operator for technical capabilities. The request for authorization from the manufacturer or authorized distributor serves the contracting authority to recognize the ability of the bidding economic operator to successfully fulfill the contract.

2.4.3. Participating economic operators must complete the table below titled Technical Bid. Failure to accurately complete the bid for all required items is a disqualifying condition.

No.	Product Description	Original Product Code (Original Brand Code of Each Vehicle)	Catalog Name	Page Number in Catalog
1				
2				
3				
4,etc				

The designation of the products must be done according to the list or estimate submitted by the CA.

Argumentation: The aforementioned criterion is determined based on Law No. 162/2020, dated 23.12.2020 “On Public Procurement”, as well as based on DCM No. 285, dated 19.05.2021 “On the Approval of the Public Procurement Rules”, as amended.

The purpose of establishing the above-mentioned criterion is to guide the Bid Evaluation Committee in the bidding phase of the technical documentation submitted by the participating operators.

In all cases where a certificate, brand, special name, patent, drawing or type, specific origin, manufacturer or entrepreneur is mentioned, their equivalent is also accepted.

2.4.4 The economic operator must present its own certifications, the object of which is in accordance with the object of the procurement. As follows:

-ISO 9001:2015 Quality Management System Certificate (valid) or equivalent

The certificate must be issued by a conformity assessment body accredited by the national accreditation body or international accreditation bodies recognized by the Republic of Albania.

Argumentation: The aforementioned criterion is determined based on Article 77, of Law No. 162, dated 23.12.2020 “On Public Procurement”, Article 40, point 5, letter a,) of the Decree of the Minister of Public Procurement No. 285, dated 19.05.2021 “On the Approval of Public Procurement Rules”.

The criterion that the EO must have an ISO 9001: 2015 Certificate (valid) or equivalent, "For the quality management system", is required to ensure that the EO has an organized quality management system for the supply of goods it offers.

Certified quality management represents official confirmation of a reliable level of business performance as well as proof of commitment to continuous improvement and meeting customer requirements.

The implementation and certification of the quality management system brings confidence to business partners and authorities regarding the products and services supplied, helping to reduce losses and improve the efficiency of the business as a whole.

ISO 9001 represents the unanimously recognized international standard as the standard that concerns the criteria for a quality management system. This standard applies to any company regardless of size or field of activity.

2.4.5. The economic operator must submit samples on the day and time of bid opening for each of the following products:

1. Lubricant oil
2. Battery
3. Antifreeze
4. AdBlue
5. Brake alcohol

The submission of samples will take place on the tender opening day before the Protocol Office of SHRUKD sh.a. The samples must be sealed in non-transparent, sealed boxes. Along with the samples, the bidder must submit an official letter, signed by the legal representative and stamped, listing the samples contained in the box. Failure to submit all required samples will result in disqualification.

The delivered goods must comply with the technical specifications defined in the Tender Documents (DST). After evaluating the samples, the contracting authority will return them to the economic operator in accordance with the provisions of the Public Procurement Law (PPL). The assessment of the submitted goods and samples will be a mandatory condition for the evaluation of the economic operator.

Argumentation: The aforementioned criterion is determined based on Article 36, and 77, of Law No. 162, dated 23.12.2020 “On Public Procurement” and Article 40, points 6/a and 8, of the Decree of the Minister of Public Procurement No. 285, dated 19.05.2021, “On the Approval of Public Procurement Rules”.

The submission of the required samples is directly related to the verification of the compliance of the technical specifications of the products offered by the participating economic operators with those required by the contracting authority in the tender documents.

The Contracting Authority is within its right, based on the public procurement legislation and the sub-legal acts issued in its implementation, to request samples of the goods, the object of procurement, to verify their compliance with the technical specifications, they are selected for items that have significant quantities which are the most requested.

The purpose set by the legislator for the submission of samples is to enable the contracting authority, which is responsible for the procurement of public funds, to carry out verifications (examination, inspection, testing) of the samples submitted by the economic operator if the latter are in accordance with the requirements of the contracting authority stated in the technical specifications of the procurement procedure.

All documents must be originals or notarized copy units thereof. Cases of non-submission of a document, or of false or inaccurate documents, shall be deemed grounds for disqualification.

Catalogs and all documents must be original and translated into Albania

TECHNICAL SPECIFICATION FORM

The description of the Technical Specifications of the goods subject to procurement must be described as accurately and completely as possible, creating conditions for fair and open competition between all candidates and bidders. The technical specifications, except in fully justified cases, must be drawn up in such a way as to take into account the accessibility criteria for persons with disabilities or design for all users, as required by the applicable law in force.

NOTE: In the Technical Specifications, no specific brand of production or source or particular process, characterizing the products or services offered by a specific Economic Operator or any trademark, patent, type or origin or specific production, must be described in order to favor or eliminate certain undertakings or products. This is allowed only in exceptional cases where there is no sufficient, accurate or understandable way to describe the subject of the Contract. Such references must be accompanied by the words "or equivalent".
